

# WebSIM

Web Based Data Upload To  
STORET

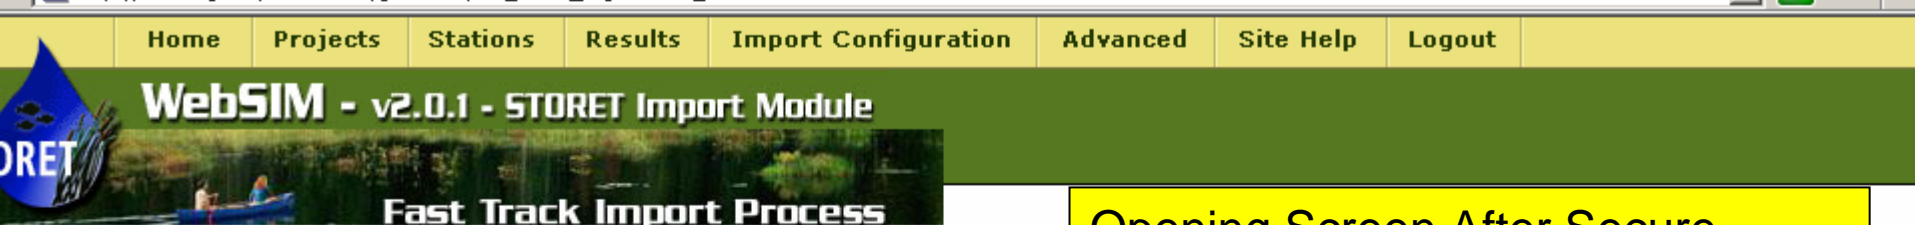

## Based On STORET Interface Module (SIM) To Move Data From Electronic Data Sources Into STORET

- Users design configuration files to match format of their data
- Defaults can be established to “fill in the blanks” information required by STORET
- Can import data files for monitoring projects, stations, physical and chemical monitoring results and biological monitoring results.
- Ability to create translations of entries in data file to match STORET definitions
- Extensive error checking

No special hardware or software needed, only a web browser.

New Project File Created In Excel. Save File As Tab Delimited Text File.

## Opening Screen After Secure Logon

**Getting Started:** Complete the steps listed below for the Fast Track Import Process. Help is given on the link to the right of every step.

**Remember to upload** your import files to the FTP site so that WebSIM can access them for processing. To upload your import files go to the FTP site and enter your username and password. Then drag and drop your import files from the folder on your computer to the FTP site window. [Click here to go to the FTP site.](#)

**Take a Tour!**   
Click here to find out how to use the  
**Fast Track Import Process**

- 1** [Step One:](#) [Step 1 Help](#)  
Select the Import Configuration - Select this option to select from a list of existing Import Configurations regardless of import type.  
Current Status: No Configuration Selected
- 2** [Step Two:](#) [Step 2 Help](#)  
Select the File to be Imported - Select this option to select a file uploaded to the organization specific FTP Site.  
Current Status: No Import File Selected
- 3** [Step Three:](#) [Step 3 Help](#)  
Import Step - Select this option to initiate the import process.

## ASCII Flat File Import Configurations

[Page Help](#)

### → [Define New Project Import Configuration](#)

Select this option to configure the system to accept a new Project file in ASCII flat file format.

### → [Define New Station Import Configuration](#)

Select this option to configure the system to accept a new Station file in ASCII flat file format.

### → [Define New Station Location Import Configuration](#)

Select this option to configure the system to accept a new Station Location file in ASCII flat file format.

### → [Define New Well Import Configuration](#)

Select this option to configure the system to accept a new Well file in ASCII flat file format.

### → [Define New Non-biological Activities / Result Import Configuration](#)

Select this option to configure the system to accept a new Non-biological Activity/Result file in ASCII flat file format.

### → [Define New Biological Activities / Result Import Configuration](#)

Select this option to configure the system to accept a new Biological Activity/Result file in ASCII flat file format.

## XML Import Configurations

### → [Define New Activities / Result Import Configuration](#)

Select this option to configure the system to accept a new Activity/Result file in XML format.
